September 25, 2024

## Mexico Gets 25% of U.S. Supply Surplus U.S. REFINED PRODUCT EXPORTS RISING

U.S. Net Exports of Petroleum Products\*, Annual Average 2005-2024\*\*

\*net exports = exports - imports  
\*\*2024 forecast by Energy Détente  
Source: EIA

Energy Détente Chart

Several developments have boosted U.S. refined product exports of late including growing domestic crude oil production and stalled domestic product demand that has been hobbled by a weak economy. In addition, U.S. refiners have performed well so far in 2024 averaging 90% capacity utilization, enabling robust gasoline and distillate output.
